

Elementary Art Workbook - Teacher Edition: A Classroom Companion for Painting, Drawing, and Sculpture, 2013, Eric Gibbons, 0983862273, 9780983862277, Firehouse Publishing, 2013

From FirehousePublications.com comes the elementary version of our bestselling book, The Art Student's™ Workbook. This elementary version was created by a 20+ year certified veteran teacher and curriculum writer for classes in drawing, painting and sculpture designed for grades three through eight. The lessons are broad and easily adjusted to accommodate different grade levels, special needs students, and material appropriate for many environments from the school classroom, or home based instruction, to a fine arts camp program. It includes nearly three years worth of lesson ideas in painting, drawing, sculpture, and clay, project samples, vocabulary, worksheets, sample tests, research paper samples, grading rubrics, sketch and note taking pages, and short creative five minute writing assignments, critiquing pages, and daily closure statements to meet district observational requirements. This book is also a helpful aid in fulfilling State and Federal accommodation requirements (504/ IEP) by providing special needs students additional documented and written material that may be taken home. These lessons combine information from core curriculum and merge it with fine art. Art is the meeting place for all subjects. When we grid we use geometry. When we make sculptures we use engineering. When we mix colors we reveal information about physics. When we create illustrations for stories we learn about literature. When we review the styles of art from da Vinci to Warhol we teach history. Students not only come to understand the concepts, but use them, and manipulate them for deeper understanding on multiple sensory levels of thinking. This workbook is divided by multicurricula units so that this concrete connection to academic core courses is more easily seen. ALL projects are designed to have successful divergent results, incorporate creative problem solving, and bring relevant connections to students' lives. This book is built for student success on many levels from gifted to challenged. This in turn is helpful in fulfilling mandated accommodations so that no child is left behind. We recommend that you pair this book with the student edition of the same name.
