Each week the oil and gas fields of sub-Saharan Africa produce well over a billion dollars' worth of oil, an amount that far exceeds development aid to the entire African continent. Yet the rising tide of oil money is not promoting stability and development, but is instead causing violence, poverty, and stagnation. It is also generating vast corruption that reaches deep into American and European economies. In Poisoned Wells, Nicholas Shaxson exposes the root causes of this paradox of poverty from plenty, and explores the mechanisms by which oil causes grave instabilities and corruption around the globe. Shaxson is the only journalist who has had access to the key players in African oil, and is willing to make the connections between the problems of the developing world and the involvement of leading global corporations and governments.

Brazzaville Charms Magic and Rebellion in the Republic of Congo, Cassie Knight, 2007, Social Science, 239 pages. Brutalized by colonialism, plundered by politicians and destroyed in terrifying civil wars: Congo Brazzaville is Africa at its worst. But it is also home to people who inspire.

Lee Kai-Chang was tired of being the model obedient Chinese son. He was tired of all that his family represented—the establishment, affluence and traditional values. He wanted to break free from the expectations placed upon him. He wanted to find his own path in life, one that was true to himself and his own desires.

The modern quantity surveyor (QS) plays a central role in the management of construction projects, although the exact nature of the role depends on who employs the QS. The QS is responsible for accurately calculating the quantities of materials and labor required for a project. This requires a high level of expertise in both construction and mathematics. The QS must also be able to communicate effectively with contractors, engineers, and other members of the construction team. This is a challenging and rewarding career, and one that requires a strong commitment to precision and accuracy.
